

The Federal Communications Commission

Dear The Federal Communications Commission,

Dear FCC,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

We as consumers already are taxed (fee charged) continuously on everything we buy or for normal services provided, when will this stop. Everybody wants to get rich at a faster rate and I would suggest consumers quit purchasing and to not sign up for services that are not essential because if they do not buy no money is made and that will stop the constant increase in prices.

Sincerely, Concerned Consumer Keep the USF Fair!

Sincerely,

D Ash
